About FiscalNote Europe

Firm Description

We started out as EU Issue Tracker. Evolved into Shungham. After joining FiscalNote in 2018, we became FiscalNote Europe.

FiscalNote offers a modern technology solution for managing global policy and corporate issues, streamlining data management, engaging stakeholders, collaborating across the enterprise, and centralising knowledge management. FiscalNote is a leading technology company, most recently recognised as a World Economic Forum Technology Pioneer. FiscalNote serves over 5000 organisations ranging from some of the largest companies in the world to trade associations, governments and nonprofits.

From legislative and regulatory monitoring to stakeholder management, grassroots and digital advocacy, FiscalNote's issues management solutions help organisations of all shapes and sizes effectively manage the impact of the outside world.

Our Products

EU Issue Tracker

What good is a safety net with holes in it? You need a systematic, obsessively complete approach to intelligence that saves you time so you can focus on more strategic work.

Systematic Dossier-Specific intelligence - You don't have time to do systematic monitoring - or at least you shouldn't. Leave the baseline intelligence to us and invest the time you'll save into adding specific value for your organisation that only you can provide.

Distant Early Warning of Future Regulation

- We are unique in systematically informing you of what the EU institutions and regulators are working on, planning, and even merely considering in terms of future policy initiatives. All the information is available in an online platform custom-tailored for each user.

Precise Summaries via Email or Our Platform

- Succinct summaries written with clarity and authority. You need to know what's going on. But you don't have time to read endless amounts of text from multiple sources. We update you with a summary email when your dossier moves, along with all the key documents.

FiscalNote Platform

FiscalNote solutions bring together what every organisation needs to survive in today's environment - an unmatched combination of global data, insightful analysis, and powerful workflow tools.

Issues Management: FiscalNote's Issue Management solution enables colleagues to work in issue teams on policies or issues that matter to them. Our policy monitoring of 20+ countries and project management tools empower teams to collaborate on risks and opportunities. Working on issues in the FiscalNote platform automates monitoring, reduces the volume of unnecessary emails, prevents duplication of effort, and improves coordination of policy messaging.

Stakeholder Management: FiscalNote provides seamless and intuitive tools to identify, manage, and map stakeholders to key opportunities and risks. Users can access pre populated profiles of legislators across the world or add their own contacts through bulk upload or using the FiscalNote business card scanner on a mobile phone. Voice dictation technology enables busy professionals to disseminate intelligence while on the move using the FiscalNote app.

System of Record and Reporting:

FiscalNote helps organisations avoid institutional knowledge loss

when staff leave or are not always sure who information should be shared with. We designed the platform to encourage teams to collaborate and share information in a way that enables automated reporting on issues, stakeholder relationships, and team impact. With a few clicks users can generate attractive reports that illustrate a team's return on investment.

Why FiscalNote Europe?

Systematic Regulatory Intelligence + Stakeholder and Issues Management

You don't have time to continuously check for potential regulatory risks or monitor dossiers as they move through the EU institutions. Our EU Issue Tracker, a comprehensive regulatory intelligence platform, combines cutting-edge technology with human analysis from our team in Brussels so you can spend your time on the work that matters most. Our systematic and complete approach also means you will not have an exploding inbox and still be left wondering where your files have got to.

FiscalNote offers a modern technology solution for managing global policy and corporate issues, streamlining data management, engaging stakeholders, collaborating across the enterprise, and centralizing knowledge management and reporting. Find out how digitizing issues management can save you time and improve impact.
